

Retail Point of Sale Features & Benefits

Lite 2011/12

Designed for start-up retailers requiring a simple to use point of sale solution. With comprehensive integration to QuickBooks, Retail Point of Sale Lite provides more than point of purchase management, it also offers features to manage sales, inventory, customers and accounting.

Point of Sale made easy

Retail Point of Sale Lite* is a computerised cash register designed with tools you need to ensure sales are processed quickly, giving your staff more time to spend with your customers.

*If you are currently using Point of Sale 2007/08 or earlier versions, you will need to upgrade to Retail Point of Sale Professional 2011/12 to continue using your database. Retail Point of Sale Lite 2011/12 can only upgrade files from earlier versions of Retail Point of Sale Lite .

Seamless integration to QuickBooks

A retail solution is not complete without seamless integration to QuickBooks. Retail Point of Sale has seamless integration with QuickBooks 2011/12 inventory, customer accounts, sales assistants and chart of accounts. Choose from QuickBooks 2011/12 Accounting, Plus, Pro, Premier or Enterprise.

Manage your stock with ease

Retail Point of Sale manages all types of inventory. You can track sales and stock on hand for a particular item. Advanced functionality includes the ability to track service items, group items e.g sell as a kit, or purchase and sell in different units of measurements e.g. buy a case or sell as a 6 pack. Or perhaps you need to track sales by units of measure* such as kilograms, metres or litres. *Units of measure only available with QuickBooks Pro, Premier and Enterprise.

Create as many touch buttons as you need

Retail Point of Sale supports advanced touch screen functionality, so you can create as many touch buttons as you need and even choose your own colour scheme and size. It makes processing transactions quick and easy whilst minimising errors and ensuring your staff have more time to spend with customers'. Much more than a computerised cash register, Retail Point of Sale has the tools you need to process sales efficiently and effectively.

Recall transactions from any terminal

Put multiple transactions on hold at one time, add a message to the transaction, such as a customer's name and recall from any terminal.

Customisable shelf labels and advertising cards

Retail Point of Sale includes a comprehensive label design and print feature, built into the software. Design your own shelf labels, advertising cards, barcodes for products or loyalty cards. The choice is virtually endless.

Retail Point of Sale Lite 2011/12

Manage customer laybys

Offer your customers the flexibility of laybys, and manage the whole process within Retail Point of Sale. You have the ability to track customer laybys along with purchase history, remaining balances on layby accounts and contact information.

Create and assign barcodes

Save time at the check-out, improve customer service and accurately process transactions by creating and assigning barcodes.

User and Role based security features

Retail Point of Sale security features help you manage sensitive transactions such as refunds and discounts by enabling you to create user roles and privileges for your employees, to help ensure user access and security of your business is tracked and maintained with ease and control.

Password-protection

Maintain security over all transaction types – especially useful for sensitive transactions such as refunds and discounts. It helps the administrator to maintain control and to minimise unauthorised transactions.

Supported hardware*

Receipt Printers
Customer Displays
Scales

Barcode Scanners
POS Keyboards

Cash Drawers
EFTPOS Terminals**

*You should check compatibility before purchasing any hardware. For a full list of supported hardware, go to www.quicken.com.au/RetailSolutions/RetailPOS/SupportedHardware.aspx

**Additional charges may apply

New feature in 2011/12

Enhanced Cash Out

With the enhanced Cash Out feature, users now have the ability to enter in the customers' desired cash out amount which is then automatically added in to the total – no more fumbling for the calculator during rush hour.

Pre-Set Memo Function

Reckon Retail POS Pre-Set Memo function allows users to publicise important or promotional messages to customers on items such as receipts.
